

# Magical Pumpkin Juice

## You will need:

- 5 cups apple juice
- 1 can (15 oz.) plain pumpkin (not pumpkin pie mix)
- 1 tsp. cinnamon
- ½ tsp. ginger
- ¼ tsp. nutmeg
- ¼ tsp. cloves
- Pitcher

## Directions:

- 1) Place the apple juice in the pitcher, then dump in the can of pumpkin. Mix the pumpkin in well to get rid of any lumps.
- 2) Add the spices to the pitcher, then mix them in very well. The spices will want to float on the top, but with some vigorous stirring all but a little of the spice should mix throughout the juice.
- 3) Refrigerate at least an hour or two (the juice tastes much better cold!) before serving. Make sure to stir the juice up before it is poured each time, as the pumpkin tends to sink to the bottom. *Finite Incantatem!*
